EXPERIENCE

Luka (Replika) — *Frontend Engineer*

JANUARY 2024 - PRESENT

Launched a modern web app. Quickly delivered features that required different areas of expertise, from creating a components library to implementing the chat subsystem. Listened to and chatted with our users on Discord.

SKB Kontur — *Senior Frontend Developer*

JUNE 2018 - DECEMBER 2023

Created and developed internal web services in the Data Science department. Maintained infrastructure for frontend apps in our team, including multiple libraries, a monorepo and CI/CD.

EDUCATION

Ural Federal University — *Computer science and Mathematics*

SEPTEMBER 2015 - FEBRUARY 2018

Studied programming using a wide variety of languages from C# to Python, web development, operating systems, algorithms and math.

MAIN PROJECTS

The majority of projects I participated in are internal, so the amount of details I can share may be limited.

An internal crowdsourcing service

Developed frontend with React and backend-for-frontend with Node.js and Koa.js. Created a DSL for visual representation of tasks.

A no-code chatbot editor

Designed UI and took part in creating frontend for a no-code chatbot graph editor. It is used to configure text and voice chatbots for the support team and some of our clients.

Infrastructure for a frontend team

Set up monorepo and CI/CD for our team, took part in creating and maintaining internal libraries, drastically reducing complexity of maintaining existing and creating new apps.

SKILLS AND TECHNOLOGIES

TypeScript, JavaScript, HTML and CSS

React.js: Next.js App Router with server actions, Vite, Redux Toolkit, Emotion, MUI, StyleX, Base UI

Node.js: Koa.js

Serverless: Google Cloud Run, Google Cloud Datastore, Vercel serverless functions, Fauna DB

Gitlab CI

Figma

MAIN SIDE PROJECTS

A Telegram chatbot in Rust

A chatbot written in Rust using the Teloxide library. Uses GCP Datastore and GCP Cloud Run.

A social media posting app

An Electron based desktop app to prepare and post content. Uses Material UI, integrates with Steam and VK.
